

B.T.O. Ayrshire

Heronries Census 2012

The ongoing aim to record the No. of pairs that nested, successfully or not, at each colony in each year.

On the right are brief details of the known heronries in Ayrshire, grouped by area, for convenience of any intending surveyors.

Detailed Grid Refs., census cards & instructions on application to myself.

This important annual survey has 'dropped of the Ayrshire radar' in recent years. Now is a good time to bring it up to date and make a commitment to keep it up to date.

One count during the last two weeks in April is the minimum requirement.

[Please help by 'adopting' one, or more, heronries near you.](#)
